Tennis API Pricing and Data Coverage by Goalserve

Access to accurate and real-time tennis data has become essential for digital platforms such as live score websites, fantasy sports applications, analytics tools, and sports betting platforms. A reliable data source ensures consistency, speed, and comprehensive tournament coverage. Goalserve is a well-established sports data feed provider offering structured tennis data through its **Tennis API**, designed to support a wide range of professional and commercial use cases.

Overview of Goalserve Tennis API

The Goalserve Tennis API delivers real-time and historical tennis data covering global professional and junior competitions. The data feeds include live scores, fixtures, match results, player statistics, rankings, and detailed point-by-point match updates. All data is available in both XML and JSON formats, allowing easy integration across various systems and platforms.

The Tennis API supports multiple applications, including:

- Live score and match-tracking platforms
- Fantasy tennis applications
- Sports analytics and performance tools
- Betting and odds comparison systems

Tennis Data Feed Coverage

Goalserve provides extensive tennis coverage across major international and regional tournaments. The API includes data from:

- ATP Tour
- WTA Tour
- Challenger Tour
- ITF Tournaments
- Grand Slam Events
- Davis Cup and Fed Cup
- Olympic Tennis Events
- Junior and Exhibition Matches

This broad coverage ensures consistent data availability throughout the tennis calendar year.

Tennis API Pricing Structure

Goalserve offers flexible subscription plans designed to suit different business needs and budgets. The pricing structure allows both small startups and established platforms to access premium tennis data without excessive overhead costs.

1-Month Tennis API Subscription – $150

The monthly plan provides full access to live tennis data, including fixtures, live scores, results, in-game player statistics, and point-by-point scoring. It is ideal for short-term projects, testing environments, or seasonal applications requiring immediate data access.

6-Month Tennis API Subscription – $900

The six-month subscription offers extended access to the same comprehensive tennis data coverage at a reduced monthly cost. This plan is suitable for platforms seeking mid-term stability and consistent access to live and historical tennis information.

12-Month Tennis API Subscription – $1200

The annual subscription provides the best long-term value, offering uninterrupted access to all tennis data feeds for a full year. This plan is well-suited for businesses that require reliable, year-round tennis data with predictable costs and ongoing updates.

Data Features Included

Across all subscription plans, the Tennis API includes:

- Live tennis scores updated in real time
- Detailed point-by-point match history
- Player profiles and statistics
- Live and scheduled fixtures
- Match results and tournament data
- ATP and WTA rankings (regular and live updates)
- Pre-match and in-play odds data

Live point-by-point scores are refreshed every few seconds, while rankings are updated regularly to ensure accuracy.

Technical Specifications

- Data Formats: XML and JSON
- Time Zone: UTC for all event start times
- Update Frequency: Real-time updates with low latency
- Uptime Guarantee: 99% service availability

These technical standards support stable integrations for high-traffic and data-sensitive applications.

Free Trial and Support

Goalserve offers a 30-day free trial, allowing users to evaluate the tennis data feeds before committing to a subscription. In addition, clients benefit from 24/7 customer support, ensuring technical assistance and data reliability at all times.

With more than 200 active clients worldwide and over 20 years of experience in the sports data industry, **Goalserve** continues to provide scalable data solutions across more than 20 sports.

Conclusion

Goalserve's Tennis API combines comprehensive tournament coverage, flexible pricing, and reliable real-time updates into a single data solution. With subscription plans designed for both short-term and long-term use, the Tennis API is positioned as a practical choice for platforms that depend on accurate and timely tennis data.
